

NON-STORM WATER DISCHARGE CERTIFICATION

The Storm Water Pollution Prevention Plan shall include measures to identify and eliminate the discharge of process wastewater, domestic wastewater, non-contact cooling water and other illicit discharges to storm water drainage systems or to surface waters of the State. An inspection of the Facility was completed on January 8, 2021. The outfall was observed at that time. During the observation, no non-storm water discharges were observed. The following certification shall serve to meet the requirements of the storm water regulations.

CERTIFICATION	
I <i>Bruce Blessing</i> certify that no non-storm water discharges to the storm water system exist at the Blessing Greenhouses and Compost Facility, Inc.
